

PROTOCOL COVID 19 TRANSFERS WITH CHAUFFEUR

At **Canarias.com** we are working to give the client maximum comfort, exclusivity and safety for their well being.

We care about our clients and employees and for this reason, we have put in place certain preventive procedures, as stated by law.

In the Interior

We have at hte clients disposition:

- Disinfectant Gel
- Tissue Paper
- Disinfectant Wipes
- Water

Washing of Hands

Each chauffeur must wash his hands immediately before picking up a passenger and after dropping him off at his destination.

Face Masks Always

All occupants should wear a face mask at all times. We supply face masks should a client need to acquire.

Luggage

The chauffeur will only handle the luggage with the consent of the lead passenger and will wear disposable gloves, disinfecting before and afterwards.

Respecting Distance

At the moment the transfers are made in our larger vehicles such as people carriers and luxury vans to guarantee the safety of all passengers and keep the required distance.

Fresh Air

The chauffeurs should maximise the ventilation by opening the windows, replacing the air filters frequently and having them "operating" and the recirculation "off" to assure the correct air flow and safety.

Disinfection

We carry out a thorough cleaning of vehicles both before and after travel using certified cleaning products approved by the health services to combat Covid 19.
